

Have You Ever Wanted to Study in Canada?

Many students and families dream of moving to Canada, taking part in our amazing [education system](#). It is world-renowned due to our fantastic approach, giving everyone the chance to realise their potential. The model is student-centred and is unique, emphasising everyone's unique learning style. This does not mean that every school features small class sizes but that there is an understanding of the diversity in thought and application. Here at Inspiration Learning Center, we take these values to the next logical conclusion, matching students up with expert teachers in small class arrangements, guaranteeing maximum student teacher interaction. In other words, there is no better option for preparing youngsters for the competitive world of university and career.

While many of our students are locals, we are proud of our international body. From countries as diverse as China, Iran and elsewhere, we not only set the groundwork for expert language (English and French) comprehension but also the critical thinking skills that are needed to stand out from the crowd. You might have seen the news recently, with the Canadian government dialling back student visas but this only applies to university. In terms of elementary and secondary school, the doors are wide open and we are ready to both welcome and prepare international students for the road ahead. As a Ministry-approved secondary school, we are able to issue "letters of acceptance" which render an applicant eligible for the necessary student visas. While there are many such schools in the province, no one employs our comprehensive individualised approach, removing any of the doubt from a process that can be easily complicated. In other words, when you get accepted to Inspiration, you are in good hands and are given the benefit of every tool at our disposal.

The Inspiration Advantage

When your child gets accepted to our program, we guide parents and guardians every step of the way, using our “hand holding approach”. Put simply, nothing is left to chance and we make sure that every “i” is dotted and every “t” is crossed. Our team takes charge of the process and makes sure that everything is done legally and in accordance with sound practice. Once in Canada, we provide expert educational consulting, allowing students to manage their grades, extracurriculars and social life. This can mean finding volunteer hours for high school graduation, part time jobs and leadership opportunities. While some students find themselves “falling between the cracks”, such mistakes never happen at Inspiration as we are tending to every detail and circumstance. Our “white glove” approach is unique and effective, resulting in our students getting accepted to Yale, Stanford, U of T, and other elite universities. Rather than worrying about testing, we combine expert tutoring with accredited high school credits, giving our students a leg up in every sense of the word.

If you are interested in understanding our system, we invite you to reach out and talk to one of our team members. We can answer any of your questions and find solutions to any problems that you find along the way. After 20 years of experience, we are confident that we are the right choice for your family. Many Canadian education is not only a dream but also a reality. No one offers our proprietary “East meets West” teaching methodology and no one goes the distance like we do.

We are excited to get to know you and find out what dreams you have for the future.
